# Introducing a New Generation of Visual Planning and Video Prompting Tools

## Apple's iPod touch® and Conover's Functional Planning System™

Now you can use the popular iPod touch/iPad® with our *Functional Skills System* videos as a visual planning and video prompting tool to increase functional independence.

### Visual Planning

Our new *Functional Planning System* provides a visual approach to daily planning. Utilizing the power of video modeling, the *Functional Planning System* can be used to plan out a user's entire day. Think of it as a cross between a video playlist and a calendar. Activities can be scheduled, and step-by-step videos prompt the user through the completion of the activity. Alarms can be set and even made to be recurring for daily tasks. Videos for many activities are already available as part of our *Functional Skills System* video library, which has over 4,000 images and videos to choose from. You can also use the capabilities of the iPod touch to completely customize the application for the user - use the camera to shoot your own pictures and video and use the built-in microphone to record your own audio.

### The Ultimate Prompting Tool

The iPod touch has been a welcome advancement in assistive technology for helping individuals achieve their goals of freedom and independence. The portability of the iPod touch opens up a whole new world of learning, whether it be at home, school, the workplace or the community. Our *Functional Planning System* makes it easy to prompt the learner in completing his or her daily activities, and can even be programmed to plan out his or her entire day.

### Basic iPod touch Package Includes

- One 32 GB iPod touch
- 1 *Functional Planning System* app (app is gifted to your iTunes® account)
- 1 *Functional Planning System* videos DVD (4,000+ high-definition audio and video files that you can use to customize your app)

### Functional Planning System DVD

Includes all 4,000+ *Functional Skills System* high-definition videos that are optimized for iPod touch and can be synced through your iTunes video library.

### Functional Planning System app sold separately through iTunes

The *Functional Planning System* application is also available for individual download through the iTunes App Store<sup>sm</sup>.
