

# Violence Prevention Program

Tools To Measure The Potential For Violence  
And To Prevent Its Occurrence

An Ounce of Prevention is  
Worth a Pound of Cure

Onsite and distance learning  
anytime, anywhere and on any device.

# Conover's Violence Prevention Program has been minimizing the risk of violence in organizations since 1998.

## Violence Prevention

The Violence Prevention Program is part of our Conover Online™ system, a research-based approach for assessing and teaching personal success skills needed in all areas of life.

### Quick Facts

- Measures risk of violence
- No reading required (full audio)
- Self-paced, user-directed learning
- No installation/setup required
- Accessible on computers and mobile devices
- Simplified data-tracking
- Comprehensive reporting options

### Pay Only for What You Use

Credits are how you deliver content to your users in Conover Online™. Credits never expire, and can be used for anything in the Conover Online™ product catalog. This means that you never overpay and access to the comprehensive data and individual reports are provided at no additional cost!

### Cloud-Based Convenience

Conover Online™ provides immediate access because there is no installation required. Once an assignment is made, the user can access it until it is fully completed. Each user's progress is saved when exiting the unit, so when logged in again, the program picks up right where the user left off, even if it is on a different computer or device.

### Built-in Accountability

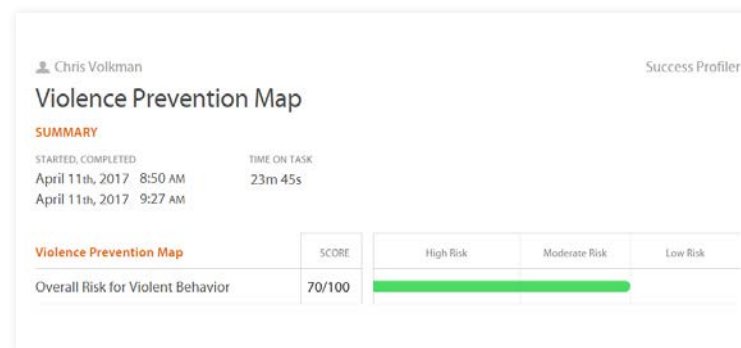

Real time data tracking is built in to the Conover Online™ system. Every time a user completes a unit, the data is stored in our management system and compiled into a comprehensive report that can be used to identify areas that need to improve and to track a user's progress throughout that process.

## The Violence Prevention Program

The Violence Prevention Program is a tool to help staff and students identify how they feel about the potential for violence in their school or organization. This practical information can be used to help administrators develop plans to avoid occasions of violence and to help make members feel safe. The Violence Prevention Program consists of two assessments and one survey.

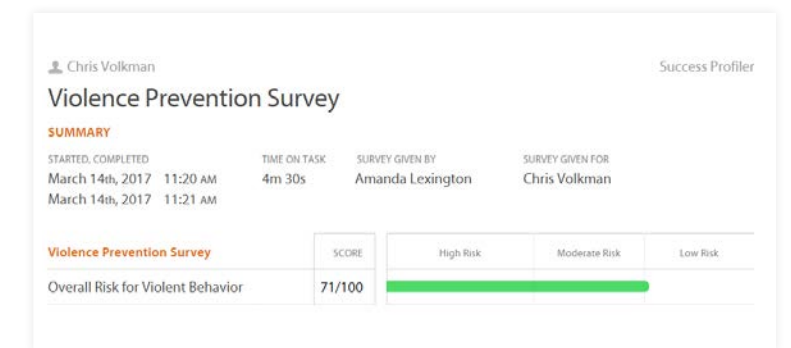

### Violence Prevention Map

The **Violence Prevention Map** is a tool to help users better understand themselves in relation to the triggers that may lead to stress and violence. The total score shows individuals how they view their ability to control emotions and behavior and to get along with other people around them, especially in potentially stressful, hostile, or threatening situations. The lower the score, the greater the risk.

### Violence Prevention Survey

The **Violence Prevention Survey** is a 360-degree assessment. The survey is an external rating system done by individuals who know the person taking the Violence Prevention Map and is intended to validate the skills of that individual.

# The Violence Prevention Program

## Violence Prevention Group Map

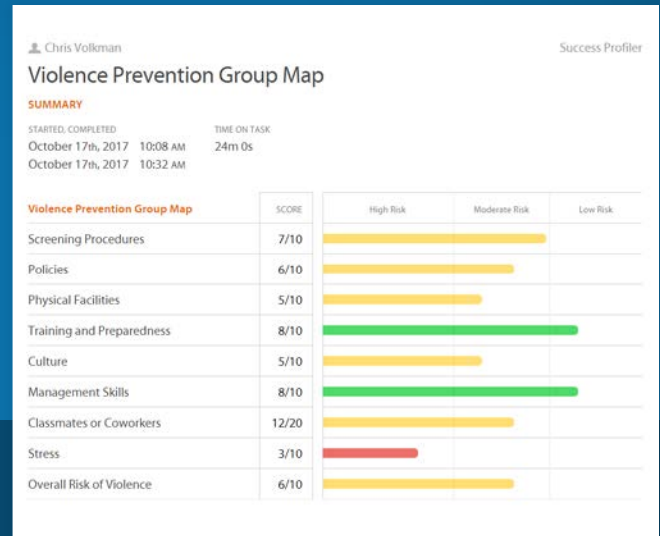

The **Violence Prevention Group Map** is a tool to help gauge how a group views its feelings of safety and security.

The results will give program administrators a picture of how all those completing the Violence Prevention Group Map feel about the potential for violence, as well as ideas to help reduce stress and avoid the occasion of violence within their organization. The scales are divided into three major categories:

- **Physical Facilities & Procedures** - includes Screening Procedures, Policies, Physical Facilities, Training and Preparedness and Culture.
- **People** - includes Management Skills, Co-workers, and Stress within the organization.
- **Overall Feelings of Safety and Security** - is a summary of how individuals feel about their safety and security.

Physical Facilities and Procedures is the easiest area in which to implement change.

Comprehensive summary results will assist the organization in getting a quick read on how their members feel about their safety and security within the organization and the individual scale scores provide a road map for positive change. The results provide data to improve policies and procedures for your anti-violence program. Test takers results remain anonymous.
